BOUNDARIES WITH PRECAST  
INNOVATION.**

# INTRODUCTION

SHREEJI Precast RCC Boundary Wall is a modern solution - driven company, committed to redefining boundary wall construction through innovation, quality, and design excellence. Backed by years of industry expertise, SHREEJI Precast specializes in high-strength Precast RCC Boundary Walls crafted to meet the growing demand for fast, durable, and aesthetic fencing systems across India.

Our advanced Precast RCC Boundary Wall concrete walling systems feature premium form-liner textures - such as natural stone, and architectural patterns - on both sides of the wall, offering a visually appealing and structurally strong alternative to conventional boundary wall solutions.

SHREEJI Precast RCC Boundary Wall stands out with its precision-engineered, factory-made walls manufactured under stringent quality control to ensure consistent finish and long-lasting performance. Whether it's for residential, commercial, industrial, or institutional campuses - our walls provide security, privacy, and beauty in one seamless system.

PRECAST INDUSTRY  
WE BUILD THE FUTURE

## BUILT FOR SAFETY

At SHREEJI Precast RCC Boundary Wall, safety isn't optional - it's our foundation. Our RCC Boundary Wall systems are designed for quick and secure installation without the need for bracing or grouting, minimizing on-site hazards and ensuring a safe, clean work zone. Safety First. Always.

## SHREEJI PRECAST RCC BOUNDARY WALL ADVANTAGE

Our Precast RCC Boundary Walls combine premium quality with budget efficiency. Engineered to withstand diverse site and climatic conditions, SHREEJI Precast RCC Boundary Walls offers a system that balances durability, speed, and affordability - making it ideal for residential, commercial, industrial, institutional, farmhouses, resorts, schools, and colleges.

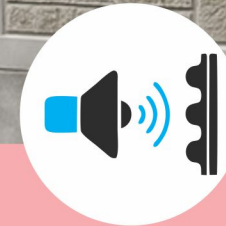

### ECO-FRIENDLY & SUSTAINABLE

SHREEJI Precast RCC Boundary Walls are manufactured using natural, abundant raw materials, with a low-energy, zero-waste process. By choosing our solution, you actively contribute to reducing environmental impact without compromising on performance or aesthetics.

### NATURAL TEXTURED FINISH

SHREEJI Precast RCC Boundary Walls are vertically cast using advanced form-liner molds to deliver highly defined decorative textures, including natural stone patterns. These textures are applied on both sides of the wall, offering equal aesthetics and elegance from every angle.

### SOUND INSULATION

Our dense Precast RCC Boundary Wall structure naturally reduces sound transmission, making it ideal for properties near highways, busy streets, or noisy neighborhoods. Peace of mind, and peace around you.

## CUSTOM COLORS & FINISHES

With a wide range of coloring techniques, customers have the flexibility to customize their wall's appearance to perfectly suit the style and vision of their project. From earthy tones to contemporary finishes - the choice is yours.

## EASY & FAST SHIFTING

Thanks to our one-piece panel & Column System, installation is completed in half the time of conventional systems. Our static footing support system ensures alignment and stability during installation, enhancing both safety and speed.

## GATES & OPENINGS

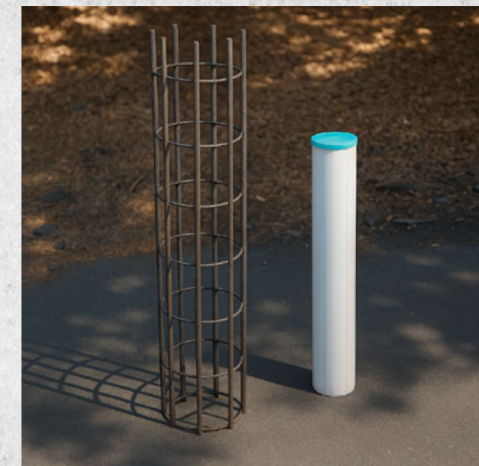

SHREEJI Precast RCC Boundary Walls are pre-engineered to accommodate gates and service openings of various sizes. Whether it's a sliding gate, pedestrian access, or utility entrance, openings are carefully planned during the initial layout - ensuring seamless integration into the wall system without compromising on strength or appearance.

# THE SHREEJI PRECAST UNI-CAST DIFFERENCE

## STATIC FOOTING STRUCTURAL SUPPORT

- Fast Installation - Less Labour
- Strong, Stable and Rigid
- Grouting not necessary
- Self Align with each wall during installation
- Does not require labour to make and tie the rebar cage
- No wastage of metal
- Structural Steel support cast into caisson footing
- Entire Wall section can be removed and reinstalled if not grouted

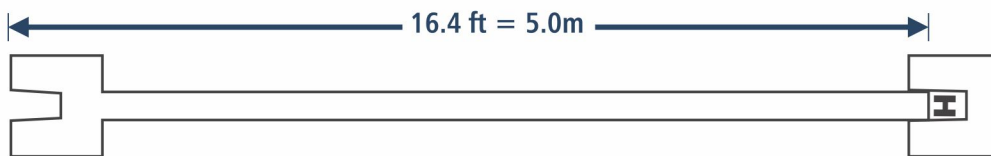

## REBAR CAGE FOOTING

- Installs 50% slower
- It is necessary to grout
- Need alignment during installation
- Requires labour to make and tie the rebar cage
- Rebar ends are wasted which account for almost 3% Rebar is cast into caisson footing
- Not possible to remove wall section

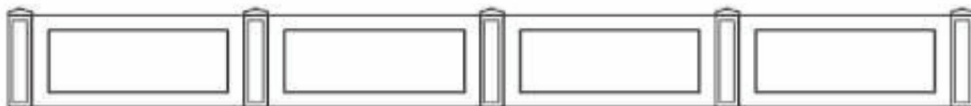

# Comparison between SHREEJI Precast RCC and other regular conventional systems.

## SHREEJI Precast RCC Boundary Wall:

SHREEJI Precast Uni-Cast Integrated Column and Panel Wall Section

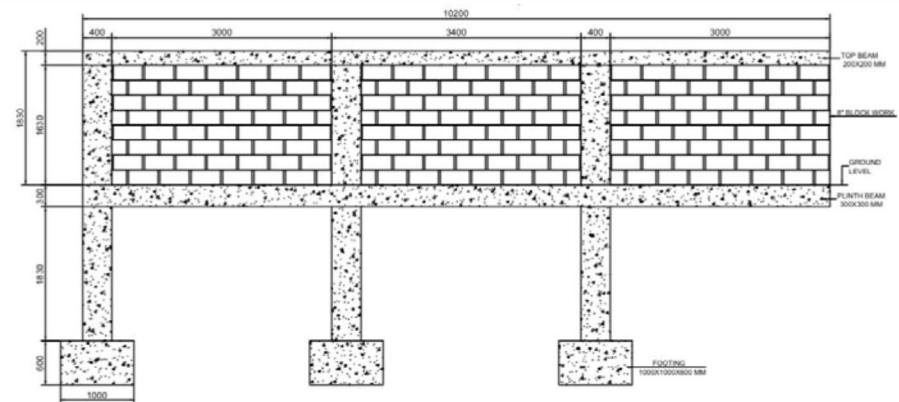

SHREEJI Precast RCC Wall with Columns 16.4ft / 5.0m on Center

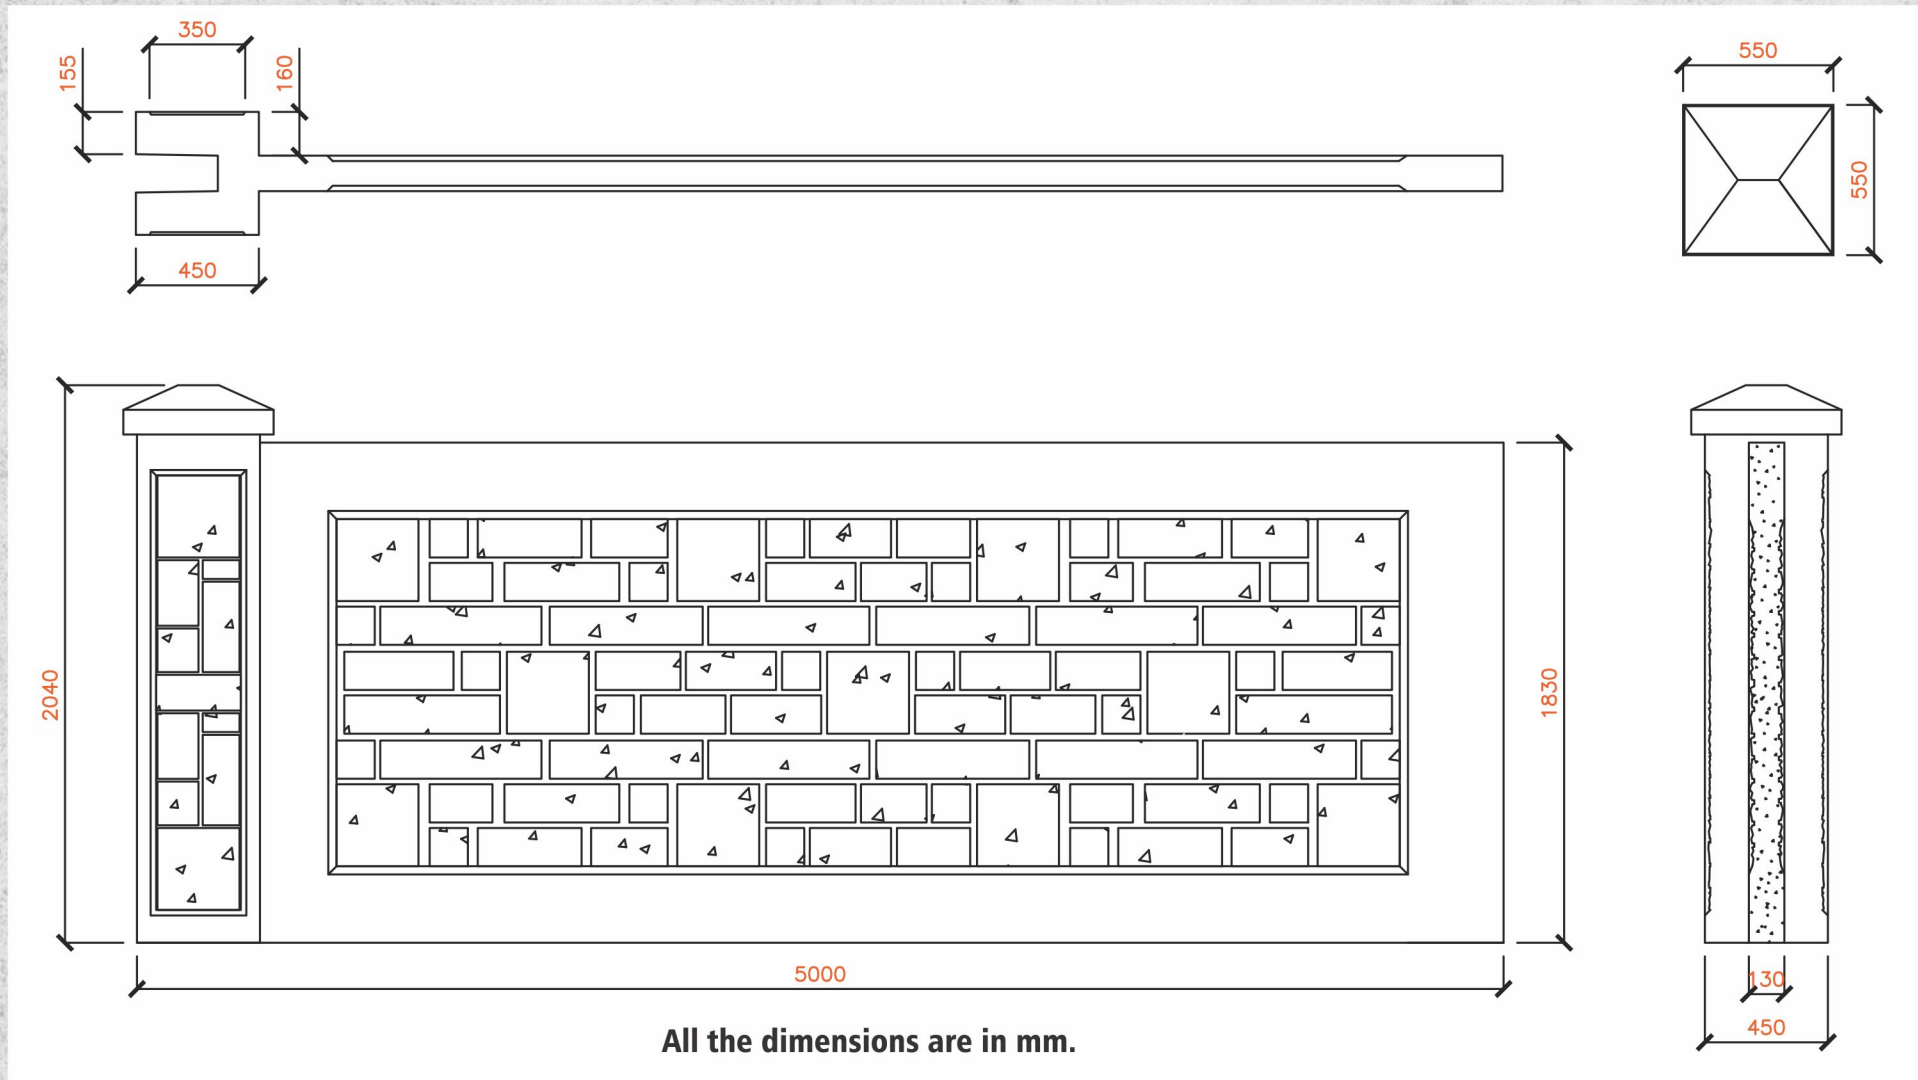

## Brick Work:

Brick Work in foundation and super structure with Brick/Rcc column & footing at every 10 ft.

# SHREEJI PRECAST RCC WALLING SYSTEM

# TECHNICAL SPECIFICATION

Made with Precast battery mould System using M-30 grade concrete reinforced with 12 mm steel bar, steel fiber and polypropylene fiber.

RCC Boundary Walls are vertically cast using advanced form-liner moulds to deliver highly defined decorative textures, including natural stone patterns.

- Length: 5 mtr (16 ft 4 in)
- Height: 1.8 mtr (6 ft)
- Area: 98.4 sq.ft. per wall
- Thickness: 5 inch (125mm)
- RCC Boundry Wall with Inbuilt Column
- Column thickness: 18 inch (450 mm)
- Weight: 3000 kg approx
- Reinforced with Rebar + Steel Fibers + Polypropylene Fiber

**Foundation may vary as per Soil Conditions.\***

# FOUNDATION STRENGTH:

- 5 ft deep Pile with (400 mm dia.) standard
- I-Beam (100x50) with pile cap
- RMC & Site mixer concrete
- Hydra unloading & Easy installation
- Factory-to-site transport ready.
